|----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------|----|------|-------------------------------------------------------------------------------------------------------------------------------------|---|
|  | 底盘                                                                                                  | 配置 | 车桥   | kessler车桥，配盘式制动器。                                                                                                                   | ● |
| 车架                                                                               | 徐工设计、制造，全覆盖式走台板，防扭转箱型结构，高强度钢材制造。                                                                    | ●  | 悬挂   | 所有车桥均采用油气悬挂系统，减震效果好，具有自动调平、悬架升降、弹性刚性转换等功能。                                                                                          | ● |
| 支腿                                                                               | 4支腿，H形布置，采用双级水平支腿，水平伸缩和垂直伸缩由液压控制，底盘两侧装有电控操纵控制台，控制台板装有水平仪、照明灯和调速按钮，支腿油缸均设有单向阀，且垂直支腿带有双向液压锁。          | ●  | 轮胎   | 10个轮胎，1个备胎，每桥均装单胎，普利司通制造，承载力大。                                                                                                      | ● |
| 发动机                                                                              | OM460LA.E3A/1，直列六缸水冷电控柴油发动机，戴姆勒制造，额定功率 360kW/1800rpm，最大扭矩 2200N.m/1300rpm，中国道路III阶段排放标准。燃油箱容积：488L。 | ●  | 制动   | 行车制动：双回路气压制动，作用于所有车轮。<br>驻车制动：弹簧贮能制动，作用于2-5轴车轮。<br>辅助制动：发动机排气制动，变速箱缓速制动、电涡流缓速制动，安全可靠，延长制动摩擦片使用寿命。                                   | ● |
| 液压系统                                                                             | 泵组直接连接在发动机的取力口上，用于支腿、转向、悬挂和独立液压散热。                                                                  | ●  | 转向   | 全桥转向，采用先进的电液比例转向控制技术，可适应多种工况的要求，实现多种转向模式。                                                                                           | ● |
| 变速箱                                                                              | ZF12档自动变速器，12个前进档2个倒档，带缓速制动。                                                                        | ●  | 驾驶室  | 新型钢结构豪华全宽驾驶室，采用悬浮式连接结构，后部装有减震器。配备电动升降器的安全玻璃、可调式座椅、电动调节后视镜、可调节高度及角度方向盘，倒车显示器、大屏幕彩色液晶显示器和CD音响等。新型组合式中控台布局安全合理，采用圆弧造型，体现人性化的设计。标配冷暖空调。 | ● |
| 分动箱                                                                              | kessler分动箱，有应急转向油泵。                                                                                 | ●  | 电气系统 | 直流24伏特，2个电池串联。                                                                                                                      | ● |

Technical specifications

|                                                                                  |                                                                                     |    |    |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|----|----|
|  | 上车                                                                                  |    | 配置 |
| 结构                                                                               | 徐工设计、制造，高强度钢材制造                                                                     |    | ●  |
| 液压系统                                                                             | 下车发动机通过传动装置驱动变量泵，用于起升、变幅、伸缩和回转。采用进口电液换向阀，与变量柱塞泵进行良好的匹配，启停平稳，风冷式液压油冷却器，有效降低系统油温。     |    | ●  |
| 操纵方式                                                                             | 先导电比例操纵，无级调速，由左右2个操纵手柄控制起重机的主要动作。                                                   |    | ●  |
| 起升机构                                                                             | 双折线绳槽卷筒，由液压马达驱动，内置行星齿轮减速器和常闭式制动器。进口钢丝绳，钢丝绳端带绳头，直接安装于索套内，提高了更换速度，方便快捷。               | 主卷 | ●  |
|                                                                                  |                                                                                     | 副卷 | ○  |
| 回转机构                                                                             | 单排四点接触球外齿式回转支承，由液压马达驱动，内置行星齿轮减速器和常闭式制动器，可连续回转360°，具有动力控制或自由滑转的功能，可无级调速              |    | ●  |
| 操纵室                                                                              | 推拉式门，可调式座椅，可翻仰20°，装有安全玻璃和顶部保护栏，配备力矩限制器、电控箱、电动前窗刮水器、发动机动力加速踏板、发动机起动开关、前窗遮阳帘等。标配冷暖空调。 |    | ●  |

|        |                                                                                    |   |
|--------|------------------------------------------------------------------------------------|---|
| 安全装置   | 液压平衡阀、液压溢流阀、液压双向锁、力矩限制器；三圈保护器，防止钢丝绳过放；臂头设置高度限位，防止钢丝绳过卷；风速仪，检测高空风速；卷扬监视装置，实时监控卷扬状态。 | ● |
| 力矩限制器  | 当实际力矩接近过载时，发出听视觉警报，并在过载之前自动停止危险动作。具有超载记忆功能（黑匣子）和故障自诊断功能。                           | ● |
| 组合配重   | 总重80t，有10t、20t、30t、40t、50t、68t和80t七种组合方式。                                          | ● |
| 电气系统吊钩 | 直流24伏特。                                                                            | ● |
|        | 12.5吨吊钩                                                                            | ● |
|        | 40t吊钩                                                                              | ● |
|        | 85t吊钩                                                                              | ● |
|        | 150t吊钩                                                                             | ○ |
| 无线遥控装置 | 进行起重机主动作及辅助动作的远程操作，提高操作的方便性及安全性                                                    | ○ |

|  臂架系统                          | 配置 |
|----------------------------------------------------------------------------------------------------------------|----|
| <b>主臂</b><br>7节，“U”形截面的筒形焊接结构。单缸插销伸缩机构，1个装有安全阀的双作用的伸缩油缸，控制每节臂的伸缩，多种伸缩模式可供选择。<br>主臂长度：13.4m～73m。                | ●  |
| <b>副臂</b><br>桁架式结构、无级变幅，有0°、20°和40°三种安装角度。<br>副臂长度：12m～44m，包含11种组合形式（12、16、20、24、28、32、36、8+24、8+28、8+32、8+36） | ○  |
| 8m主臂加长节                                                                                                        | ○  |
| 连接架                                                                                                            | ○  |
| 旋转架                                                                                                            | ○  |
| 两节副臂                                                                                                           | ○  |
| 4m加长节                                                                                                          | ○  |
| 8m加长节                                                                                                          | ○  |
| <b>臂端单滑轮</b><br>单滑轮，安装在主臂顶端用于单股钢丝绳起重作业，起重性能与主臂相同，但最大起重量不超过11t。                                                 | ●  |

产品各部件明细如上所述，具体部件明细请参照产品报价单

|  | Chassis                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Configuration           |   |
|----------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---|
| Frame                                                                            | Designed and manufactured by XCMG, it is made of high strength steel with fully covered walking surface and anti-torsion box-typed structure.                                                                                                                                                                                                                                                                                                                                                                                                                   | ●                       |   |
| Outriggers                                                                       | Four outriggers arranged in H-shape are hydraulically controlled by control levers. Double-stage outrigger beam is adopted. There is an outrigger control station located at each side of the chassis, and there is a level gauge, an illuminator and two speed buttons on each control station. There is a check valve fitted in each outrigger cylinder, and a double-way hydraulic valve fitted in each jack cylinder.                                                                                                                                       | ●                       |   |

|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|---------------|
| Frame            | Designed and manufactured by XCMG, made of high strength steel.                                                                                                                                                                                                                                                                                                                                           |                 | ●             |
| Hydraulic system | Variable pump driven by chassis engine, used for hoisting, elevating, telescoping and slewing operation. Imported electro-hydraulic change valve, matching perfectly and stably with plunger variable pump. Air-cooled hydraulic oil cooler may effectively reduce the oil temperature in the system.                                                                                                     |                 | ●             |
| Operating mode   | The electric-proportional pilot operation system is equipped with two levers on the left and right controlling the main movements of the crane can archive stepless slewing speed regulation.                                                                                                                                                                                                             |                 | ●             |
| Winch system     | The winch system equipped with drum of Lebus grooves is driven by the hydraulic motor, has build-in planetary gear reducer and constant closed brake. The imported wire rope has a rope head, which is directly installed in pouch socket. Time for replacing wire rope is shortened, the replacement is easy and fast. This shorten the time for replacing wire rope and make the process easy and fast. | Main winch      | ●             |
|                  |                                                                                                                                                                                                                                                                                                                                                                                                           | Auxiliary winch | ○             |
| Slewing system   | A single-row, four-point contact-ball external slewing bearing is driven by hydraulic motor, with built-in planetary gear reducer and constant-closed brake equipped, and may continuously slew 360°. Power control and free slewing function as well as stepless speed regulation are available.                                                                                                         |                 | ●             |
| Operator's cab   | Large arc glass, sliding door, adjustable seat with 20° tilting are adopted. Safety glass and top protective rails, LMI, controller box, electric windshield wipers, engine accelerator pedal, engine start switch and windshield visor, etc. are also available. Heater and air conditioner are standard.                                                                                                |                 | ●             |

| Safety devices             | Hydraulic counterbalance valve, hydraulic relief valve, hydraulic double-way valve and LMI are available. Lowering limiter is equipped in winch to prevent rope over-releasing. Anti-two block is fitted on the boom head to prevent rope over-winding. Anemometer is equipped to check whether aerial wind velocity is in safe working range. Winch monitor is for real-time monitoring of winch running. | ● |
| LMI                        | When the actual load moment is approaching overloading value, audible and visual warning will be sent out, and the dangerous operation will be automatically stopped before overloading. Overload memory function (black box) and fault self-diagnosis function are available.                                                                                                                             | ● |
| Combined counterweight     | Total weight is 80t.<br>7 counterweight combinations of 10t, 20t, 30t, 40t, 50t, 68t and 80t are available.                                                                                                                                                                                                                                                                                                | ● |

1. 表中额定总起重量值，是在平整的坚固地面上本起重机能够保证的最大总起重量，包括吊钩和吊具的重量，所以为了估算重物重量，必须减去上述的装置重量。
2. 表中的工作幅度为起吊重物离地时起重物到起重机回转轴线的水平距离，是包括起重臂变形量在内的实际值，因而起吊前应考虑起重臂变形量。
3. 只允许在5级(瞬时风速14.1m/s，风压125N/m<sup>2</sup>)风以下进行作业。
4. 吊重前操作者必须对物体的重量和工作范围了解后选择合适的作业工况，严禁超出表中的数值。幅度及臂长在相邻两个数值之间时，应依据两个数值中较小值确定起重作业。
5. 应按主臂仰角范围作业，即使是空载，也不应使主臂仰角处于范围外，谨防整机倾翻。
6. 表中的主臂长度应要按照每节臂的伸缩要求进行伸出。

1. The total rated loads given in the rated load charts are the maximum lifting capacity when the crane is set up on firm and level ground, which includes the weight of the hook block and slings. The weight of above-mentioned devices should be deducted from the rated lifting load.
2. The working radius shown in the rated load charts is the radius when the load is lifted off the ground, and it is the actual value including loaded boom deflection. Take boom deflection into consideration before beginning a lifting operation.
3. A lifting operation is permissible only when the wind force is below grade 5 (instantaneous wind speed is 14.1 m/s, wind pressure is 125 N/m<sup>2</sup>).
4. Before beginning lifting operation, the operator should know the weight of the load to be lifted and its working range, and then select proper working conditions. Never operate the crane beyond the limit shown in the chart. Use the lower value from the chart when the boom length or working radius is between the range of values.
5. Observe the boom angle limit. Never operate the crane with the boom angle beyond the recommended limit even if a load is not being carried. Otherwise, the crane will tip.
6. The boom should be extended according to the telescoping code shown by digits, which means the percentage of boom sections extended.
